The shapes of the Euclidean, Cubo, Cilindro, Sfera and Pyramid geometry, in four different marbles (white Carrara marble, black Marquinia marble, Travertino and Emperador dark) form the base of the table completed by a large transparent glass plate. The four elements are independent and can be positioned freely, without the table losing its identity indifferently to the position of the elements that compose it, all however necessary to give it stability. There are four versions according to the chosen material.
