## Series Hello

WALL MOUNTED

Luminaires designed for wall mounting, combining a general lighting module with a spotlight featuring an adjustable lens. A perfect solution for those looking for interesting bedside lighting ideas. When two circuits are used, both light sources can operate independently. Version A is equipped with an infrared switch. It's enough to move your palm closer to it to turn the light on or off.

Basic, complementary, and spot lighting. Hello will work perfectly at establishments such as clubs, galleries, and hotels, but also as lighting for the office and home.
