230V 17.4 W 2460 lm

indirect light

The structure, with its essential and fluid design, gently wraps and protects the light source thanks to its twisting, generating a dynamic effect. The light, coming from an LED source, is hidden behind an opalescent diffuser that softens its intensity, diffusing it in the environment in a delicate and refined way. The result is a lamp with indirect light that illuminates the surrounding space and contributes to generating an intimate and relaxing atmosphere.
Aluminium wall lamp with indirect LED light.
